

Powder Actuated System-Power Tools

NH361MX

NH361MX is a popular tool with automatic power load & power nail feeding mechanism.

- Specifications: -Tool Length: 390mm
- Tool Weight: 2.8kg
- Tool tube: dia.8.6mm
- fasteners: YDMX nails with max. length 32mm.
- Power Loads: S1J, S1JL power loads

NH361

NH361 can be used widely in concrete, steel, brick, rock base, etc..

- Specifications: -Tool Length: 390mm -Tool Weight: 2.6kg
- Tool tube: dia.8.6mm
- fasteners: PS、YD、PD、PJ、YJ、M6A、M8、HM8、JP、PK nails with max. length 76mm.
- Power Loads: S1J, S1JL power loads

SDQ301

SDQ301 is the most popular powder-actuated fastening tool in the world. This low velocity, medium-duty fastening tool has a semi-automatic power load feeding mechanism. Easy, handy and quick operation makes it the extremely ideal for fastening jobs. It's with two types: normal 301 type; power adjusted 301T type.

- Specifications: -Tool Length: 340mm -Tool Weight: 2.3kg
- Fasteners: YD, HYD, PD, PJ, JD, KD30 pins and M6, M8, HM8 studs up to 62mm(2 1/2") in length. PK, JP land JPA fasteners.
- Power Loads: -S1(.27cal.short) in magazine of ten each, four power levels.

SDQ307

SDQ307 Versatile, handy, reliable and simple tool. Semi-automatic piston returning, semi-automatic power load ejection with high-strength Plastic housing. Suitable for most fastening work.

- Specifications:
- Tool Length: 335mm
- Tool Weight: 1.85kg
- Fasteners: YD, HYD, PD, PJ, JD, KD30 pins and M6, M8, HM8 studs up to 76mm(3") in length. PK, JP land JPA fasteners.
- Power Loads: -S5 (.22cal.necked) power loads, four power levels.

SDQ603

SDQ603 This versatile, safe, reliable and powerful tool Can fasten nearly all heavy, medium or light-duty fasteners, It uses S1 or S3 power loads. Optimum antispall and anti-spatter shield makes the fastening performance better.

- Specifications: -Tool Length: 375mm
- Tool Weight: 3.5kg
- Fasteners: YD, HYD, DD, HDD, PD, KD pins and all types of stud up to 78mm(3")in length.
- Power Loads: S3(.27cal.long) power, loads, four power levels S1(.27cal.short) power, loads, four power levels

SDQ606

SDQ606 is a new popular heavy type tools. It's with big-volume, thick tube, big power, auto-restoration, long-life etc. It could be used in all kinds of base., especially to high grade concrete base.

- Specifications: -Tool Length: 420mm -Tool Weight: 4kg
- Tool tube: dia.8.6mm
- fasteners: PJ, PJA, PD, YJ, KD30、HM6, HM8, HM10, JP, PK, M6, M6A, M8, M10, KD, YD, HYD, PS, DD, PDA, YDB, HDD nails with max. length 76mm; nails with dia.12mm washer{needs to replacing tube}.
- Power Loads: S1, S3 power loads

Powder Actuated System-Power Tools

BWT310

BWT310 is used in installing heat preservation layer(25mm-200mm thickness) on the concrete, air brick, mosaic wall.

Specifications:

- Tool Length: 413mm
- Tool Weight: 2.56kg
- fasteners: special nails for heat preservation layer BG25-100(to BG120-200, it needs special parts).
- Power Loads: special strip power loads

DX450

DX450 is a international universal indirect operative fastening tool. With silencer, power level adjustable system and consecutive shooting function, DX450 is suitable for most fastening works.

Specifications:

- Tool Length: 340mm
- Tool Weight: 3.2kg
- fasteners: YD, HYD,PD,HPD,M6A,HM6A,M8,HM8,KD30 UP TO 62MM
- Power Loads: S1JL/S1J long strip power loads

JD-322

JD-322 is a kind of light duty tools, which is used in construction of concrete , steel ,brick and rock base. The advantages of safety, simple frame, and easy operation makes it used in homework more. .

Main Technical Data:

- Principle : low-velocity, piston driven.
- Power Loads: - S5 (.22Cal).
- Matching Fastener: PJ, PJA, PD, YJ, HM6-10, JP, PK, M6, M6A, M8, KD, YD, HYD, PS, PDA, YDB, etc. (length below 63mm) .
- Overall Length: 335mm;
- Weight: 1.85kg.

JZ-608

JZ-608 has the same common features of tools SDQ603 and JZ605 and other similar makes both in China and countries. And many effective measures are taken in aspects of adaptability, safety, efficiency, light weigh, beautiful outlook, easy in operation and convenience in maintenance. It has been widely used in industries of construction , installation, ornamenting, metallurgy, transportation, communication and electricity.

Specifications:

- Principle: medium-velocity, piston driven
- Matching Power Loads: S1 (6.8/11) S3 (6.8/18)
- Matching Fasteners: YD, MYD, DD, HDD, PD, JD, KD, KDA, M4, M6, HM6, M8, HM8, M10, HM10, JPA
- Overall Length: 376mm -Weight: 3-3.1kg

ZG660

ZG660 can be used widely in concrete, steel, brick, rock base, etc..

Specifications:

- Tool Length: 352mm
- Tool Weight: 3kg
- fasteners: ZP, ZK6, ZK1/4 nails with dia.6mm or dia.6.3mm.
- Power Loads: S52 power loads.

ZG103

ZG103 is a direct operative fastening tool which is small-volume, light-weighted, easy-operated and beautiful. It can be widely used in construction, installation and metallurgical industry works.

Specifications:

- Tool Length:325mm
- Tool Weight: 2.3kg
- Fasteners: high-speed fasteners(head dia: 6mm、 6.3mm)
- Power Loads: S43 (.25cal) power loads.
